

HORT 689: Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security

For Spring 2019, enroll in a unique, collaborative online course with content experts from Texas A&M University, the University of Arkansas, and Texas Tech University. This interdisciplinary course will incorporate a wide range of topics focusing on international development at the nexus of Horticulture and Nutrition.

International Experience in Guatemala

Select graduate students from each University who successfully complete the course will have the opportunity to participate in a service learning experience throughout beautiful Guatemala in May 2019. Students will gain immersive, hands-on experience in international development.

Interested students are encouraged to contact Dana Lewis (dklewis@ag.tamu.edu) and Dr. Tim Davis (t-davis5@tamu.edu) for registration details.
